JOURNAL OF NUCLEAR MEDICINE

Official Journal of

THE SOCIETY OF NUCLEAR MEDICINE

VOLUME 8, 1967

CONTENTS

VOLUME 8 JANUARY, 1967 NO. 1

R. N. Beck, D. B. Charleston, P. Eidelberg and P. V. Harper. The ACRH Brain Scanning System 1

D. Bruce Sodee. Combination Scanning Procedures in the Evaluation of Bronchogenic Carcinoma 25

Frederick J. Bonte and Thomas S. Curry. Technetium-99m HSA Blood Pool Scan Diagnosis of an Intracardiac Myxoma 35

K. N. Jeejeebhoy, P. Ramanath, K. P. Mehan, S. M. Pathare, D. V. Parekh, G. D. Nadkarni and R. D. Ganatra. A Simple Method of Estimating Folic Acid Absorption 40

Muhammad Abdel Razzak, Mahmoud Maguib and Mohamed El-Garhy. Fate of Sodium Pertechnetate-Technetium-99m 50

J. Litvak, E. Oberhauser, J. Riesco, O. López, R. Armendaris, I. Alliende and F. Solís. Sr-85 Kinetics in Hypoparathyroidism at Different Levels of Calcium Intake 60

Joseph P. Kriss, Raymond Barrall, Robert Greenberg, Gerald Hanks, Charles E. McLennan, and Edward Siegel. Guidelines and Criteria for a Committee Authorizing the Use of Radioactive Isotopes in Humans 70

Letters To The Editor

N. David Charkes 74

Donald R. Korst 75

Abr. A. Sherman 76

VOLUME 8 FEBRUARY, 1967 NO. 2

M. Donald Blaufox, M.D., E. James Potchen, M.D., and John P. Merrill, M.D. Measurement of Effective Renal Plasma Flow in Man by External Counting Methods 77

HENRY N. WELLMAN, M.D., JAMES G. KEREIAKES, Ph.D., THOMAS B. YEAGER, M.S., GERALD J. KARCHES, M.D. AND EUGENE L. SAENGER, M.D. A Sensitive Technique for Measuring Thyroidal Uptake of Iodine-131 86

A. E. JOHNSON, B. HARTLEY, AND F. GOLLAN. Preparation and Properties of Chromium-51 Labeled Inulin 97

WILLIAM H. STRAIN, DANIEL T. DANAHY, RICHARD J. O'REILLY, MARTIN R. THOMAS, ROBERT M. WILSON, AND WALTER J. PORIES. Promotion of Radioisotope Excretion 109

HANNS-DIETER GRUMER, NANCY MERROW AND CAROL WOODARD. Determination of *in vivo* Distribution Columes in Man With Non-Reactive Compounds 117

MILTON H. FELDMAN, JAMES MCNAMARA, RICHARD C. REBA AND WILLIAM WEBER. Protein-Bound Iodine Determination by Activation Analysis ... 123

ALBERT F. KELSO, ALEXANDRA A. TOWNSEND, AND GARY S. SCHIRS. Analysis of Factors Used in Calculations Based Upon Radiocardiograms on Dogs .. 132

P. RICHARDS AND HAROLD L. ATKINS. A Collimator System for Scanning at Low Energies 143

Letter to the Editor 154

VOLUME 8 **MARCH, 1967** **NO. 3**

TITUS C. EVANS, ROBERT M. KRETZSCHMAR, ROBERT E. HODGES, AND CHANG W. SONG. Radioiodine Uptake Studies of the Human Fetal Thyroid 157

E. L. KANABROCKI, L. F. CASE, L. GRAHAM, T. FIELDS, E. B. MILLER, Y. T. OESTER, AND E. KAPLAN. Non-Dialyzable Manganese and Copper Levels in Serum of Patients with Various Diseases 166

GEORGE B. MCADAMS, KENNETH R. KNOX, AND DAVID S. WILCOX. The Initial, Rapid-Phase Disappearance of Intravenous Radioinsulin in Diabetes ... 173

J. C. WIDMAN AND E. R. POWSNER. Energy Absorption in Cylinders Containing a Uniformly Distributed Source 179

R. L. WITCOFSKI, C. D. MAYNARD, AND T. J. ROTER. A Comparative Analysis of the Accuracy of the Technetium-99m Pertechnetate Brain Scan: Followup of 1000 Patients 187

RICHARD P. SPENCER, GUSTAVO MONTANA, GERARD T. SCANLON, AND OTELIA R. EVANS. Uptake of Selenomethionine by Mouse and Human Lymphomas, with Observation on Selenite and Selenate 197

LEWIS E. BRAVERMAN, ANGELA E. FOSTER, AND RONALD A. ARKY. Oragrafin and the Triiodothyronine Uptake Test of Thyroid Function 209

C. C. STEWART, A. COOPERSMITH, AND M. INGRAM. Irreversible Cellular Damage Following a Commonly Employed Iodination Procedure 213

JOHN A. KENNEDY AND GERALD S. BESSES. Comparison of Adsorption of Iodine-131-Thyroxine to Glass and Plastic Containers 226

J. FISHER, R. WOLF, AND A. LEON. Technetium-99m as a Label for Erythrocytes 229

VOLUME 8 APRIL and MAY, 1967 NOS. 4 and 5

Proceedings of the Fourteenth Annual Meeting

Olympic Hotel—Seattle, Washington
June 20-23,1967
SCIENTIFIC PROGRAM*

Annual Meeting Committees	237	April 1967 Issue
Foreword	238	
Program Outline	239	
Scientific Program	240	
Plenary Session Abstracts	255	
Nuclear Pioneer Lecture		
To be Honored—Prof. Gilbert N. Lewis	257	
Lecturer—Prof. Willard F. Libby	259	
Scientific Program Abstracts	261	
Technologist's Scientific Session	354	
Scientific Exhibits	365	
Commercial Exhibits	367	May 1967 Issue
Teaching Sessions	368	
Papers to be Read by Title	379	
Exhibit on Nuclear Medicine Literature	406	
Motion Picture Program	408	

**Both* the April 1967 and May 1967 issues of the Journal were utilized as *Special Convention Issues* to carry the entire program and abstracts. Pages 237-316 appear in the April 1967 issue; pages 317-390 appear in the May 1967 issue.

VOLUME 8 JUNE, 1967 NO. 6

Moshe Ben-Porath, B.S., and Ervin Kaplan, M.D. Modification of a Multi-Isotope Color Scanner for Multi-Purpose Scanning ... 411

John U. Hidalgo, Robert M. Wright, and Mary Margaret Wooten. Prediction of Technetium-99m Yield from Molybdenum-99 Generators ... 426

Wil B. Nelp, Steven M. Larson, and Richard J. Lewis. Distribution of the Erythron and the RES in the Bone Marrow Organ ... 430

Guio Uchiyama, M.D., A. A. C. Hitchcock, and A. C. Morris, Jr. Clinical Results with a Color-Recording Rescanner ... 437

Felix J. Pircher, M.D., Banks Anderson, Sr., M.D., Patrick J. Cavanaugh, M.D. and Kathryn W. Sharp, A.B. Experiences with a Solid State Detector for Surface Counting of Phosphorus-32 ... 444

Philip M. Johnson, M.D., and William A. Sweeney, M.D. The False-Positive Hepatic Scan ... 451

Gamal E. Megahed, M.D., and Gamal A. Senna, M. Ch. Radiocardiographic Formula for the Calculation of the Area of the Stenotic Mitral valve ... 461

RAYMOND BERKE, M.D., AND JAMES L. QUINN III, M.D. Iodine-131 T-3 Resin Uptake Using Cold Incubation 475
LETTER TO EDITOR 478

VOLUME 8 JULY, 1967 NO. 7

JAMES L. QUINN, III, AND WILLIAM N. BRAND. Pertechnetate-99m Thyroid Scans Obtained Incidental to Brain Scan 481
GERALD T. TELANDER AND MERLE K. LOKEN. Comparison of the Scintillation Camera with a Conventional Rectilinear Scanner Using Technetium 99m Pertechnetate in a Tumor Brain Phantom 487
D. A. ROSS, R. H. ROHRER, AND C. C. HARRIS. Quantitative Counting in the Presence of Coincidence-Summing Scintillations 502
W. HORST, H. H. RÖSLER, C. SCHNEIDER, AND A. LABHART. 306 Cases of Toxic Adenoma: Clinical Aspects, Findings in Radioiodine Diagnostics, Radiochromatography and Histology; Results of ^{131}I and Surgical Treatment .. 515
VICTOR HERBERT, CHESTER W. GOTTLIEB, KAM-SENG LAU, NORMAN R. GEVIRTZ, LENA SHARNEY, AND LOUIS R. WASSERMAN. Coated Charcoal Assay of Plasma Iron Binding Capacity and Iron Using Radioisotope Dilution and Hemoglobin-Coated Charcoal 529
P. A. BARDFELD, V. LOPEZ-MAJANO, AND H. N. WAGNER, JR. Measurement of the Regional Distribution of Arterial Blood Flow in the Human Forearm and Hand 542

VOLUME 8 AUGUST, 1967 NO. 8

MANUEL TUBIS, Ph.D., KENNETH PARSONS, B.A., JOHN S. ENDOW, B.A., SURJAN S. RAWALAY, Ph.D., AND PAUL H. CRANDALL, M.D. The Preparation of Labeled Carbohydrates for Biomedical Uses 551
JAMES W. TYSON, B.S., JAMES H. MEADE, JR., Ph.D., GLENN V. DALRYMPLE, M.D., AND HORACE N. MARVIN, Ph.D. Some Biomedical Applications of a Non-Linear Curve Fit Method 558
WILLIAM H. OLDENDORF, M.D. AND MASAMI KITANO, M.D. Radioisotope Measurement of Brain Blood Turnover Time as a Clinical Index of Brain Circulation 570
NORMAN S. MACDONALD, MICHAEL HAYES, AND WM. G. FIGUEROA. Medical Utility of a Total Body Counter—a Four Year Assessment 588
THOMAS G. HENNESSY, W. EUGENE STERN, AND STEPHEN E. HERRICK. Cerebeller Hemangioblastoma: Erythropietic Activity by Radioiron Assay 601
R. O. SMITH, B.S. AND W. D. LOVE, M.D. A Buffer Storage Interface for Use in Recording Individual Scintillation Pulses on Magnetic Tape 607
GEORGE L. JACKSON, M.D., MARGARET L. CORSON, M.D., AND JANE DICK. The Cellular Localization of Mercury-203 Chlormerodrin in Astrocytomas 611
LEOPOLDO J. ANGHILERI, Ph.D. Radioactive Chromic Phosphates: Comparative Study of the *in vivo* Distribution and Feasibility of Preparation 617
Obituary—Richard E. Ogborn 622

Letter to the Editor
Saul Aronow, Ph.D. 623
C. M. E. Matthews, M.D. 625

VOLUME 8 SEPTEMBER, 1967 NO. 9

N. David Charkes, M.D., Robert E. Cantor, M.D., and Bernard Goluboff, M.D. A Three Day, Double Isotope, l-Triiodythyronine Suppression Test of Thyroid Authonomy 627
David H. Woodbury, M.D., and William H. Beierwaltes, M.D., Fluorine-18 Uptake and Localization in Soft Tissue Deposits of Osteogenic Sarcoma in Rat and Man 646
Ervin Kaplan, Chai Moo Cho, Joseph Greco, Peter J. Talso and Leonard A. Graham. Interaction of Sodium Ion with Serum Protein 652
Shin-Hwa Yeh, M.B. and Joseph P. Kriss, M.D. Distribution and Scintiphotography of a New Complex, Pentavalent Technetium-99m Citrate: Studies in the Rodent 666
R. D. H. Stewart, M.B., M.R.C.P. and I. P. C. Murray, M.D., F.R.C.P. (Ed.) The Estimation of Extra-Thyroid Neck Tissue Radioactivity During Thyroid Radioiodine Uptake Measurements 678
E. Hallaba, Ph.D. and H. El-Asrag. Preparation of Neohydrin Labelled with Mercury-197 or Mercury-203 by Exchange Reaction 686
Alvin Blum. Technetium-99m Sulfide Colloid Preparation 692
James W. McCoo. An Inexpensive Brain Scan Phantom 694
Letter to Editor 697
President's Annual Report 699
Annual Meeting Program Announcement 700

VOLUME 8 OCTOBER, 1967 NO. 10

Kenneth R. McCormack, M.D. and Glenn Sheline, M.D. Long-Term Studies of Solitary Autonomous Thyroid Nodules 701
Teruo Nagai, Minoru Jimbo, and Keiji Sano. Cerebro-Pulmonary Scan Using Macroaggregated Albumin as a Quantitation of Intracerebral Arterio-Venous Shunting 709
M. P. Papworth, B.Sc. Grad. A.I.P. and J. T. Andrews, M.B. (Lond.) M.R.-A.C.P., M.C.R.A. D. Obst. R. C. OG. Localization of Bone Disease with Radiostrontium 723
Fred Mishkin, M.D. and Frank Castronovo, M.S. Evaluation of Ascorbic Acid as an Adrenal Scanning Agent 735
D. L. Tabern, Ph.D., John Kearney, M.D., and Ann Dolbow, B.S., MT (ASCP). Clinical and Equilibria Studies of Thyroid Function Using The Trisorb Resin Sponge 740
Robert E. Cantor, M.D. and N. David Charkes, M.D. The Effect of TSH on the Solitary Hyperfunctioning Nodule 758
Letter to the Editor 769
Society of Nuclear Medicine Annual Meeting and Call for Abstracts-Scientific Program Announcement 772

VOLUME 8 NOVEMBER, 1967 NO. 11

DANIEL M. LAVINE, M.D., MATHEWS B. FISH, M.D., MYRON POLLYCOVE, M.D., AND ARCHIE KHENTIGAN, M.S. Rapid Scintiphotographic Placental Localizations Utilizing Free ^{99m}Tc Pertechnetate 773

SUBJECT INDEX

*Indicates abstracts presented at the annual meeting or at chapter meetings.
†Indicates letter to the editor.

A

Absorptiometry in two-component systems using isotopic x-ray sources, 388*
Activation analysis
In vivo for measuring total-body calcium, 268
Mn and Cu levels in blood serum, 166
Mn, Cu and Na in human bile, determined by, 891
Medical applications of, 256*
Protein-bound iodine, determination by, 123
Uniform dose for photoactivation analysis of iodine, 342*
Adrenal
^{14}C and ^{125}I-labeled DDD isomers and analogs for, 381*
Scanning with iodinated DDD analogs, 352*
Scanning, ascorbic acid as an agent, 735
Scanning with ^{131}I-stigmasterol, 352*
Adrenal medulla, concentration of radioactivity from labeled epinephrine and its precursors, 800
Adsorption of ^{131}I-thyroxine to glass and plastic containers, 226
Albumin
Also see individual radionuclides
Comparison of RIHSA and ^{197}Hg-chlormerodrin for scanning intracranial arteriovenous malformations, 879
Electronic counting, size distribution and control of MAA in suspension, 405*
High specific activity ^{99m}Tc albumin, 396*
^{128}I human serum for brain scanning, reliability of, 625†
^{131}I macroaggregated for blood-flow in forearm and hand, 542
^{131}I macroaggregated for cerebro-pulmonary scan, 709
^{131}I macroaggregated for evaluating bronchogenic carcinoma, 25
Loss of labeled albumin in children measured by total-body counting, 330*
Placental scanning with ^{99m}Tc albumin, 387*
Plasma-volume determination using RIHSA, 357*
Preparation and metabolism of MAA, 394*
Radioalbumin suspension with higher specific activity and more uniform size, 303*
Regional arterial blood flow of limbs, scanning with ^{131}I MAA, 279*
Stenotic mitral valve area, determined with $^{131}IHSA$, 461
^{99m}Tc-labeled human serum for intracardiac myxoma diagnosis, 35
Venous blood-flow measurements in legs with ^{99m}Tc, 277*
Aorta, lipid deposition in rat liver and aorta affected by BAPN, 837
Aquarium fish, use of in radioisotope research, 394*
Assay of low-energy gamma emitters with well ionization chambers, 362*
Assays of radioactive materials, 306*
Autoradiography
Autonomous function of nodular thyroid with double-isotope autoradiography, 337*
Localization studies of ^{18}F in bone, 269*

B

BAPN effect on lipid deposition in rat liver and aorta, 837
Bile, nondialyzable Mn, Cu, Na in, 891
Blocking agent (Flagyl) interfers with thyroid-function tests, 478
Blood
Blood flow within extremity during reactive hyperemia, 279*
Blood-pool turnover, 570
Cerebro-pulmonary scan using ^{131}I MAA, 392*, 709
^{51}Cr metabolism in normal individual, 293*
Excretion after administration in congenital hemolytic anemias, 385*
Extra-corporeal irradiation in chronic lymphocytic leukemia, 255*
Flow in forearm and hand with ^{131}I MAA, 542
Flow scanning with ^{134m}Cs and ^{129}Cs, 305*
Flow through cardio-pulmonary tree visualized with scintillation camera, 276*
Immunoassay of peptide hormones in plasma, 255*
Irosorb test compared with colorimetric method, 357*
Mercury binding to erythrocytes, 292*
Muscle blood flow measured with ^{133}Xe in hemiplegic patients, 277*
Nondialyzable levels of Cu and Mn in blood serum, 166
Peripheral circulation studies with RISA in diabetes, 278*
Plasma and bone calcium kinetics in pregnant and lactating animals with ^{45}Ca, 268*
Plasma iron-binding capacity with coated charcoal assay, 529
Plasma-volume determinations, laboratory errors, 357*
Plasma ^{59}Fe clearance $T_{1/2}$ variation with plasma iron concentration, 297*
Platelet survival with ^{51}Cr in trombokinetics, 293*
Rapid-phase disappearance of radioinsulin from, 173
RBC lifespan distribution with endogenous ^{14}CO production, 292*
RBC ^{42}K influx, for diagnosis of malignancy and hemolytic anemia, 291*
RBC survival and whole-body retention, computer analysis, 292*
Red-cell survival time with ^{51}Cr, 75†
Regional arterial blood flow of limbs, scanning with ^{131}MAA, 279*
^{75}Se-selenomethionine incorporation in lymphocytes, test of globulin synthesis, 290*
Sodium ion interaction with serum protein, 652
Time-lapse scintiphotography in blood-circulation studies, 277*
Venous blood-flow measurements in legs with ^{99m}Tc albumin, 277*
Zinc-binding capacity of serum, 299*
Board of Trustees
Definition of nuclear medicine, 901
Guideline statement of eligibility and training requirements in nuclear medicine, 900
Body composition
Body K and lean body mass, 329*
In chronic obstructive pulmonary disease, 329*
Whole-body counters, accuracy and precision of assay, 328*; correction, 450
Bone
Autoradiographic localization of ^{18}F in bone, 269*
Colloidal chromic phosphate for treating chronic synovial effusion, 274*
Compression of vertebrae studied with ^{85}Sr, 272*
Distribution pattern of ^{85}Sr in osteoarthritis of knee, 273*
Early detection of bone metastasis from carcinoma of breast, 272*
^{18}F uptake and localization in soft tissue deposit of osteogenic sarcoma, 646
^{198}Au in patients with rheumatoid arthritis, 273*

Localization of bone disease with ^{85}Sr, 723
Measurement of plasma and bone calcium kinetics in pregnant and lactating animals with ^{45}Ca, 268*
Mineral content measured *in vivo*, 268*
Scanning with ^{85}Sr and ^{87m}Sr, 392*
^{85}Sr kinetics, relation to hypoparathyroidism, 60
^{85}Sr scans, aid in selecting patients for ^{32}P therapy, 390*
^{87m}Sr assay with ^{113}Sr, ^{113m}In as calibration standard, 74†
^{87m}Sr for scanning, 273*
Total-body calcium determined by *in vivo* activation analysis, 268*
Bone marrow
Colloidal ^{113m}In for scanning, 304*
Dissociation of RES and erythron activity after irradiation, 295*

Distribution of erythron and RES labeled with ^{59}Fe and ^{99m}Tc, 430
Erythron and Re cell, quantitative distribution of, 294*
^{52}Fe ferrous citrate vs ^{99m}Tc sulfur colloid for distribution of hematopoietic and reticuloendothelial marrow, 294*
Labeled hydrous ferric oxide colloid (^{68}Ga), distribution in, 302*
^{99m}Tc iron colloid, new agent, 301*
Toxicity studies of ferric oxide colloid, 393*
Vascularity of femoral head, 403*
Brain
Blood-flow studies with scintillation camera, 263*
Blood-pool turnover, 570
Brain and liver scans as screening procedures for bronchogenic carcinoma, 389*
Cellular localization of ^{203}Hg chlormerodrin in astrocytomas, 611
Cerebellar hemangioblastoma: erythropoietic activity by radioiron assay, 601
Cerebral blood-flow dynamics correlated with time-lapse scintiphotography, 263*
Cerebral blood-flow measurement with ^{133}Xe and scintillation camera, 264*
Cerebral blood-flow studies with Anger camera, 264*
Cerebral microcirculation assessment, 267*
Cerebro-pulmonary scan with ^{131}I MAA, 392*, 709
Delayed tumor uptake with ^{203}Hg-chlormerodrin, 360*
Diagnosis of low-pressure hydrocephalus by CSF ^{131}IRISA scanning, 267*
Feasibility of quantitative scanning with ^{197}Hg Neohydrin, 769†
Gamma camera and scanner for brain tumor with ^{99m}Tc-pertechnetate, comparison of, 487
Histopathologic studies with ^{198}Au-stennous hydroxide for microembolism of cerebral capillaries, 392*
^{131m}In chelates and ^{99m}Tc pertechnetate as agents, compounds of, 261*
^{113m}In and ^{99m}Tc as agents for cerebral scanning, comparison of, 261*
^{123}I albumin for brain scanning, reliability of, 625†
Isotope cisterno- and ventriculo-graphy, 266*
Kinetic studies in brain scintiphotography, 262*
Measuring brain extracellular space, complicating factors, 266*
Mechanism of brain and tumor penetration by scanning agents, 792
Middle cerebral artery occlusion, variation in scan pattern, 380*
Passage of subarachnoid blood into systemic circulation, 265*
RIHSA and ^{197}Hg-chlormerodrin for scanning intracranial arteriovenous malformations, comparison of, 879
Scanning children, 390*
Scanning correlated with other neurological diagnostic procedures, 265*
Scanning with ACRH system, 1
Scans with ^{197}Hg chlormerodrin for cerebral infarction, 383*
Scanning with ^{99m}Tc, 359*
Scans with ^{99m}Tc, accuracy of, 187
Sequential cranial scintiphotography for vascular characterization of brain lesions, 262*
Transverse tomography for brain with scintillation camera, 315*
Uptake of ^{99m}Tc pertechnetate by choroid plexus, 387*
Vertex view in scanning, clinical use of, 384*

C

Calcium
Body retention of ^{47}Ca, 270*
Gastrointestinal absorption with ^{45}Ca and ^{47}Ca, 270*
Measurements of plasma and bone ^{45}Ca kinetics in pregnant and lactating animals, 268*
Total-body calcium determined by *in vivo* activation analysis, 268*
Camera, scintillation
Autofluorscope for quantifying pulmonary physiology, 342*
Camera-1,600-channel analyzer combination, 312*
Cerebral blood-flow measurement with ^{133}Xe and camera, 264*
Cerebral blood-flow dynamics correlated with time-lapse scintophotography, 263*
Cerebral blood-flow studies, 264*
Clinical advantages of, 361*
Compared with scanner, 321*
Compared with scanner using ^{99m}Tc-pertechnetate for brain tumors, 487
Delayed tumor uptake with ^{203}Hg-chlormerodrin, 360*
Digital positron camera, performance of, 315*
Dynamic function studies with, using storage oscilloscope, 276*
Early thyroid uptake measurements with, 336*
Effectiveness of using ^{99m}Tc sulfur colloid with, 360*
Evaluation of rectilinear scanners and cameras for scintiphotography, 389*
Full-size scintiphotos from camera, 403*
Iron absorption, rapid and slow phases, 297*
Line-source phantom for testing performance, 829
Lung ventilation and perfusion by camera and ^{133}Xe, 393*
Myocardial scanning with ^{84}Rb, 359*
Placental imaging and localization with ionic ^{99m}Tc pertechnetate, 350*
Placental localizations, 773
Quantitation of RISA aerosol distribution in normal lung, 404*
Regional pulmonary ventillation with ^{133}Xe and Anger camera, 343*
Renal and cerebral blood-flow studies, 263*
Scintiphotography and scintiscanning, a comparison, 319*
Sequential cranial scintiphotography for vascular characterizations of brain lesions, 262*
Time-lapse photography in blood-circulation studies, 277*
Transverse-section tomography with, 314*
Transverse tomography, initial clinical results in brain, 315*
Cancer
Bronchogenic carcinoma, liver and brain scans as screening procedures for, 389*
Bronchogenic carcinoma, evaluated by combination scanning procedures, 25
Early detection of bone metastasis from carcinoma of breast, 272*
Extracorporeal irradiation in chronic lymphocytic leukemia, 255*
Hyperbaric oxygenation, effect on radioisotope uptake by tumor, 379*
Induction of mouse leukemia, age factors in, 339*
Intralymphatic administration of radioisotope in malignant melanoma treatment, 347*
Labeled phosphate uptake in tumors, 386*
^{32}P therapy of skeletal metastasis, patient selection aided by ^{85}Sr bone scans, 390*
Radioiodine therapy of thyrotoxicosis and thyroid cancer, 256*
RBC ^{42}K influx, for diagnosis of malignancy and hemolytic anemia, 291*
Carbohydrates, preparation of labeled compounds, 551
Carbon-11 for scanning, 305*
Carbon-14
Ascorbic acid (1-^{14}C labeled) as agent for adrenal scanning, 735
Breath $^{14}CO_2$ data, computer analysis, 326*
4-^{14}C-cholesterol distribution in terminal patients, 395*
^{14}C and ^{125}I labeled DDD isomers and analogs for, 381*
Concentration of activity from labeled epinephrine and precursors in adrenal medulla, 327*
Distribution volumes of nonmetabolizable amino acids labeled with, 117
Kidney clinical studies with ^{14}C-creatinine, 280*
Labeled cholesterol deposition studies in rat liver and aorta, 837
Labeled epinephrine and precursors, concentration in dog adrenal medulla, 800
Rate of medium chain fat absorption in malobsorptive disorders, 326*
RBC lifespan distribution with endogenous ^{14}CO production, 292*
Uptake and secretion of ^{14}C-cholesterol by isolated perfused rat liver, effect of biliary obstruction, 308*
Cellular damage from iodination procedure, 213
Cesium

^{134m}Cs and ^{129}Cs for blood-flow scanning, 305*
Myocardial scans with ^{131}CsCl correlated with coronary arteriograms, 275*
Chelates
Comparison of ^{113m} In chelates and ^{99m}Tc pertechnetate as agents, 261*
Of Mn and Zn promote radiosotope excretion, 110
Chlormerodrin
Brain scans with ^{197}Hg for cerebral infarction, 383*
Comparison of RIHSA and ^{197}Hg-chlormerodrin for brain scanning intercranial arteriovenous malformations, 879
Delayed tumor uptake with ^{203}Hg-chlormerodrin, 360*
Dose to kidney, labeled with ^{197}Hg, 697†
^{197}Hg and ^{203}Hg labeled, prepared by exchange reaction, 686
^{197}Hg, feasibility of quantitative scanning, 769†
^{197}Hg labeled for evaluating bronchogenic carcinoma, 25
^{203}Hg labeled, deposition of in neoplastic cells of astrocytomas, 611
^{3}H-Digitonin method for serum cholesterol assay, 401*
Cholesterol (4-^{14}C) distribution in terminal patients, 395*
Chromium-51
Chromic radiophosphates, *in vivo* distribution and preparation, 617
^{51}Cr metabolism in normal individuals, 293*
Folic acid absorption determination, 40
Inulin labeled with, preparation and properties for glomerular filtration rates, 97
Lung and liver scanning with labeled Dextran, 306*
Passage of subarachnoid blood into systemic circulation, 265*
Platelet survival in thrombokinetics, 293*
RBC survival and whole-body retention, computer analysis, 292*
Red-cell survival time with, 75†
Splenic sequestration of ^{51}Cr red cells in hepatosplenic bilharziasis, 396*
Chromosomal aberrations for hamster thyroid after ^{131}I administration, 333*
Collimators, for scanning at low energies, 143
Colloids
Effectiveness of using ^{99m}Tc sulfur colloid with scintillation camera, 360*
Erythron and RES distribution, 430
Hepatic scanning with, 451
Sulfide colloid preparations, a modified procedure, 692
^{99m}Tc iron colloid for bone-marrow scanning, 301*
^{99m}Tc sulfur, patient reaction when prepared by thiosulfate-dextran method, 896†
Colon scanning with ^{99m}Tc pertechnetate, 394*
Compartments, metabolic systems with re-cycling, 328*
Computer
Buffer storage interface for recording scintillation pulses on magnetic tape, 607
Computer analysis of breath $^{14}CO_2$ data, 326*
Computer analysis of scans, 290*
Computer-derived cardiac-output measurements correlated with direct determinations, 276*
Computer model of iodine metabolism for studying endemic goiter, 332*
Computer-processed scans, clinical aspects of, 388*
Computer representation of three-dimensional scan data, 288*
Digital diagnostic coding system, 313*
Double-isotope method for phagocytic and catabolic rates of human RES, 295*
Filtering scan data using system response function, 286*
Interface for multicrystal rectilinear scanner, 287*
100-level computer-processed scintiscan, 287*
Program for liquid-scintillation counting, 364*
Simulation of data from scanning systems, 312*
Copper
Determination in human bile by activation analysis, 891
Levels in blood serum, 166
Cyclotron installation for biomedicine, 330*

D

Detector systems
ACRH brain scanning system, 1
Anthracene cell for counting weak beta-emitting nuclides (^{35}S), 822
Autofluorscopes for quantifying pulmonary physiology, 342*
Autofluoroscopic camera using image amplification, 317*, 847
Catheter p-n junction detector for hemodynamic studies, 316*
Dose check meter for radiopharmaceuticals, 382*
Dynapix, clinical experience with, 384*
Dynapix, design and performance of, 319*
Dynapix, evaluation of, 320*
Dynapix, preliminary experience with, 320*
Dual-crystal system for thyroid iodine uptake, 86
Hybrid positron scanner, 317*
Linear scanner, 859
Liquid-scintillation counting, a computer program, 364*
Multiprobe dynamic function, 363*
Multistage image-tube device, 316*
Quantitative counting in presence of coincidence-summing scintillations, 502
Scintillation probe for cardiac output, 871
Solid-state for surface counting ^{32}P, 444
Spark imaging camera, Spintharican, 318*
Whole-body counters, accuracy and precision of assay, 328*; correction, 450
Whole-body counter, four-year clinical assessment, 588
Transverse-section tomography with scintillation camera, 314*
Well ionization chambers for assaying low-energy gamma emitters, 362*
Peripheral circulation in, 278*
Rapid-phase disappearance of radioinsulin in, 173
Dialysis perfusion system for determining interaction between sodium ion and serum protein, 652
Digital diagnostic coding system for clinical nuclear medicine, 313*
Digital rate meter, 364*
Distribution volumes of nonmetabolizable compounds including AIB-C^{14}, 117
Dose check meter for radiopharmaceuticals, 382*
Dose of ^{197}Hg Neohydrin to kidney, 697†
Dosimetry with whole-body counter, 306*

E

Edema diagnosis using ^{131}IHSA and ^{22}NaCl, 278*
Editorial, Samuel N. Turiel, 899
Energy absorption in cylinders with uniformly distributed source, 179
Extracellular fluid volume measured with ^{35}S and anthracene cell, 822
Eye, counting ^{32}P in lesions with solid-state detectors, 444

F

Fat absorption in malabsorptive disorders, 326*
Fat absorption studies with ^{131}Triolein and ^{125}I-oleic acid, 356*
Fulorine-18
Localization studies in bone using autoradiography, 269*
To detect primary bone tumor metastatic to soft tissue, 646
Uptake and localization in soft tissue deposits of osteogenic sarcoma, 646
Folic acid absorption estimated with ^{3}H and ^{51}Cr, 40

G

Gallium-68
^{68}Ga, ^{99m}Tc, ^{113m}In, comparative evaluation for scanning, 301*
Labeled hydrous ferric oxide colloid, distribution of, 302*
Gold-198
^{198}Au scanning in hepatic amebic disease, 310*
Quantitative ^{198}Au scan in diffuse hepatic parenchymal disease, 309*
Rheumatoid arthritis, 273*
Spleen pickup of ^{198}Au, 402*
Splenic concentration of ^{198}Au in liver scans, 390*

H

Heart
Accuracy of cardiac outputs with radiocardiography, 132
Body composition in chronic obstructive pulmonary disease, 329*

Cardiac and placental scanning with ^{113m}In, 351*
Cardiac output, measurement with labeled microspheres, 275*
Cardiac output with scintillation probe, 871
Cardiac scanning with dual-isotope technique, 359*
Catheter p-n junction detector for hemodynamic studies, 316*
Correlation of computer-derived cardiac output measurements with direct determinations, 276*
Correlation of myocardial scans and coronary arteriograms, 275*
Formula for calculating area of stenotic mitral valve, 461
Intracardiac myxoma diagnosis with ^{99m}Tc human serum albumin, 35
^{85}Kr inhalation tests compared with oxygen saturation studies for detecting circulatory shunts, 356*
Myocardial scanning with ^{85}Rb, 359*
Helium-3
^{3}H-digitonin method for serum cholesterol assay, 401*
History of nuclear medicine and physics, 76†
Hyperbaric oxygenation, effect on radioisotope uptake by tumors, 379*

I

Immunoassay of peptide hormones in plasma, 255*
Indium, 113m
Cardiac and placental scanning with, 351*
Colloidal form for liver, spleen and bone-marrow scanning, 304*
Comparison of ^{113m}In and ^{99m}Tc for cerebral scanning, 261*
Comparison of ^{113m}In chelates and ^{99m}Tc pertechnetate as agents, 261*
^{113m}In, ^{99m}Tc, ^{68}Ga, comparative evaluation for scanning, 301*
Lung scanning with ^{113m}In iron hydroxide particles, 346*
Insulin
Rapid-phase disappearance in diabetes, ^{131}I labeled, 173
Inulin
^{51}Cr-labeled, preparation and properties for measuring glomerular filtration rates, 97
Labeled with ^{131}I, 551
Iodine-123
Labeled albumin for brain scanning, reliability, 625†
Cellular damage from iodination procedure, 213
Iodine-125
^{125}I and ^{14}C labeled DDD isomers and analogs for, 381*
^{125}I radiation sources, 331*
Positive scintigraphy of tumor with intra-arterial injection of MAA, 313*
Three-day, double-isotope suppression test, 627
Iodine-131
Adrenal scanning with iodinated DDD analogs, 352*
Adrenal scanning with ^{131}I-stigmasterol, 352*
Adsorption of ^{131}I-thyroxine to glass and plastic containers, 226
Allograft survival following antibody suppression with ^{131}I-labeled antigen, 348*
Blood-flow measurements in forearm and hand with ^{131}I MAA, 542
Cellular damage from iodination procedures, 213
Cerebro-pulmonary scan with ^{131}I MAA, 392*, 709
Chromosomal abberations in hamster thyroid after ^{131}I administration, 333*
Concentration in facial structures, 398*
Diagnosis of low-pressure hydrocephalus by CSF ^{131}RISA scanning, 267*
Diagnosis of toxic adenoma in thyroid, 515
Extra-thyroid scanning, 810
Extra-thyroid neck tissue radioactivity, estimation of, 678
Fetal thyroid uptake of, 157
Hyperthyroidism treatment with ^{131}I, 335*
Hypothyroidism after hyperthyroidism therapy with ^{131}I, 399*
Joint scanning with ^{131}I-Iodipamide, 273*
Labeled insulin, rapid-phase disappearance of in diabetes, 173
Labeled oragrafin and triiodothyronine uptake test of thyroid function, 209
Macroaggregated albumin for cerebro-pulmonary scans, 709
Macroaggregated albumin for evaluating bronchogenic carcinoma, 25
Morphological and functional changes in thyroid tissue with ^{131}I, 334*
Preparation and metabolism of MAA, 394*
Pulmonary distribution of ^{133}Xe solution and ^{131}I MAA, a comparison, 344*
Radiobiologic factors in radioiodine-induced hypothyroidism, 333*
Ratio of PBI to in vitro binding of triiodothyronine by serum proteins, index of free thyroxine in serum, 381*
Renal plasma flow by externally counting OIH ^{131}I, 77
Short-term results of ^{131}I therapy of hyperthyroidism, 334*
Stomach scanning with ^{131}I Toluilen red, 395*
T-3 resin sponge test with color incubation, 475
Three-day double-isotope suppression test, 627
Thyroidal uptake, sensitive detector and technique, 86
Iron
Absorption in hemochromatosis before and after therapy, 298*
Absorption of ^{55}Fe and ^{59}Fe, rapid and slow phases, 297*
Distribution of ^{55}Fe hematopoietic and reticuloendothelial marrow, 294*
Erythropoietic activity of ^{59}Fe measured by radioiron assay, 601
Ferrokinetics ^{59}Fe of Cu-Ca deficiency anemia, 298*
^{59}Fe excretion after administration in congenital hemolytic anemias, 385*
^{59}Fe labeled erythron distribution studies of bone marrow, 430
Plasma ^{59}Fe binding capacity, 529
Plasma iron clearance variation with iron concentration, 297*

K

Kidney
Blood-flow studies with scintillation camera, 263*
Clinical studies with ^{14}C-creatinine, 280*
Differential kidney-function assessment, rapid sequential scanning, 282*
Glomerular filtration rates determined with ^{51}Cr labeled inulin, 97
Improved scanning method, 358*
Metabolism of hydroxyproline in osteopathy of chronic renal failure, 281*
Plasma flow by externally counting OIH ^{131}I, 77
Radioiodinated inulin, 551
Renal blood flow determined by external monitoring of ^{131}I-Hippuran disappearance, 281*
Renal plasma-flow measurement with ^{99m}Tc(V)-citrate complex, 280*
Renogram evaluation, comparison of methods, 282*
Scans for evaluating renal trauma in children, 283*
^{99m}Tc(V)-citrate complex, potential use in kidney scintillography, 666
Uniprobe dynamic-function study, 362*
Kinetic studies in brain scintiphotography, 262*

L

Least squares test
Qualifications in its use, 623†
Rapid calculation method, 154†
Leukemia
Extracorporeal irradiation, 255*
Induction of mouse leukemia, age factors in, 339*
Splenic trapping of heated erythrocytes in leukemia, 379*
Lewis, Gilbert Newton: Nuclear Pioneer Lecture, 258*
Libby, Willard Frank, 259*
Licensing radioisotopes
Guidelines and criteria for authorizing human use, 70
New members of AEC advisory committee, 39
Lipid deposition in rat liver and aorta affected by BAPN, 837
Liver
Allocation of amoebic abscess by distribution of intrahepatic branches of portal vein, 311*
Celiac arterial perfusion scanning, 310*
^{51}Cr-Dextran, scanning with, 306*

Colloidal ^{113m}In for scanning, 304*
False-positive scans, 451
^{198}Au scanning in hepatic amoebic disease, 310*
Hepatic radiation injury, assessed with radioisotopes, 384*
Improved liver-scanning method, 358*
Lipid deposition in rat liver and aorta affected by BAPN, 837
Liver and brain scans as screening procedure for bronchogenic carcinoma, 389*
Phagocytic capacity of aggregated albumin and removal capacity of BSP from liver, 296*
Pulmonary excretion of ^{75}Se, relationship to liver function, 309*
Quantitative ^{198}Au scan in diffuse hepatic parenchymal disease, 309*
Regeneration after hepatectomy, evaluated by scanning, 309*
Scan in detecting and treating amoebic abscess, 402*
Scans using breath holding, 386*
Simultaneous OIHA and renographic renograms, 403*
Splenic concentration of ^{198}Au in liver scans, 390*
Uptake and secretion of ^{14}C-cholesterol by isolated perfused rat liver, effect of biliary obstruction, 308*
^{65}Zn metabolism in cirrhotic rats, 299*

Lung
Anterior and posterior scans compared for information content, 347*
Bronchogenic carcinoma scanning with ^{197}Hg chloromerodrin and ^{131}I MAA, 25
^{51}Cr-Dextran, scanning with, 306*
^{18}F to detect and localize primary bone tumor metastatic to soft tissue, 646
^{113m}In iron hydroxide particles for scanning, 346*
Misinterpretation of lung scans in diagnosis of pulmonary embolism, 345*
Non-functioning lung, inhalation scan in emphysema, 344*
Pulmonary distribution of ^{133}Xe solution and ^{131}I MAA, a comparison, 344*
Pulmonary scanning and angiography in embolic lung disease, a correlation, 344*
Quantifying pulmonary physiology with autofluoroscope, 342*
Quantitation of RISA aerosol distribution in lung, 404*
Regional alterations of ventilation/perfusion ratios detected by scanning, 343*
Regional pulmonary ventilation with ^{133}Xe and Anger camera, 343*
Scanning, evaluation of ethiodol as agent, 391*
Scans in general hospital population, diagnostic value, 402*
Scan, significance of shine through on side-views scan, 400*
Scanning in chronic respiratory disease, 397*
Scanning with dual-detector system, 346*
Ventillation and perfusion, quantitation using scintillation camera and ^{135}Xe, 393*

Lymph node scanning with radiogold, 296*

M

Macroaggregates, see individual radionuclides

Manganese
Determinator in blood serum by activation analysis, 166
Determination in human bile by activation analysis, 891
Excretion promoted by manganese (^{54}Mn) disodium EDTA chelate, 110
Metabolism in chronic Mn poisoning, 300*

Melanoma, concentration of labeled precursors of melanin, 391*

Mercury-197
Bronchogenic carcinoma evaluation with chlormerodrin and ^{131}I MAA, 25
Comparison of RIHSA and ^{197}Hg-chlormerodrin for brain scanning intracranial arteriovenous malformations, 879
Dose to kidney of Neohydrin, 697†
Feasibility of quantitative scanning with ^{197}Hg Neohydrin for brain, 769†
Neohydrin labeled with ^{197}Hg or ^{203}Hg prepared by exchange reaction, 686
Scans with ^{197}Hg chlormerodrin for cerebral infarction, 383*

Mercury-203
Chlormerodrin localization in neoplastic cells of astrocytomas, 611
Delayed tumor uptake with ^{203}Hg-chlormerodrin, 360*
Neohydrin labeled with ^{203}Hg or ^{197}Hg prepared by exchange reaction, 686

Metabolism, ^{51}Cr in normal individuals, 293*

N

Non-linear curve-fitting for biomedical problems, 558; errata, 922

Nuclear Pioneer Lecture, 258*

O

Obituary, Richard E. Ogborn, 622

Optimum scanning with ^{75}Se, 321*
Pancreas carcinoma scanning, 387*
Pancreatic-disease evaluation by dual-channel scanning, 349*
^{99m}Tc compounds for scanning, 302*

Parathyroid
Scanning, with blood background subtraction, 311*
^{85}Sr kinetics in bone in hypoparathyroidism, 60

Phantom
Estimating specific activity in phantom target with external counting, 331*
Inexpensive for brain scanning, 694
Line source for testing scintillation-camera performance, 829

Phosphorous
Chromic radiophosphates (^{32}P), *in vivo* distribution and preparation, 617
Colloidal chromic phosphate (^{32}P) for treating chronic synovial effusions, 274*
Labeled-phosphate uptake in tumors and morphologically injured tissues, 386*
^{32}P surface counting with solid-state detector, 444

Placenta
Imaging and localization with ionic ^{99m}Tc pertechnetate, 350*
Placental and cardiac scanning with ^{113m}In, 351*
Placental localizations with free ^{99m}Tc pertechnetate, 773
Scanning with ^{99m}Tc albumin, 387*

Plasma testosterone, assay using double-isotope dilution derivative, 341*

Potassium-42, RBC ^{42}K influx, for diagnosis of malignancy and hemolytic anemia, 291*

Q

Quantitative counting in presence of coincidence-summing scintillations, 502

R

Radioactivity uptake in organs, *in vivo* measurement of absolute quantities, 397*

Radioimmunoassay of growth hormone, test for pituitary suppression, 325*

Reticuloendothelial blockage by colloidal particles, 296*

Reticuloendothelial phagocytic and catabolic rates, double-isotope method, 295*

S

Salivary gland scintigram, 351*

Scanner
ACRH brain scanning system, 1
Collimator for low-energy scanning, 143
Color-recording rescanner, 437
Compared with scintillation camera, 321*
Compared with scintillation camera using ^{99m}Tc-pertechnetate for brain tumors, 487
Computer interface for multicrystal rectilinear scanner, 287*
Dynapix, clinical experience with, 384*
Dynapix, design and performance of, 319*
Dynapix, evaluation of, 320*
Dynapix, preliminary experience with, 320*
Hybrid positron scanner, 317*
Linear scanner, 859
Modified multi-isotope color scanner, 411; correction, 501

Performance of scanner, assessment of data handling, 319*
Processor for scan data, 289*
Scan analyzer for color display from black and white, 323*
Scanning
Adrenal scanning with ascorbic acid as agent, 735
Adrenal with iodinated DDD analogs, 352*
Adrenal with ^{131}I-stigmasterol, 352*
Area scanning for quantitative measurement of radioactivity in internal organs, 312*
Arterial blood flow in forearm and hand with ^{131}I MAA, 542
Body distribution of Cs, I, Hg with spark chamber (Spinthericon), 318*
Bone marrow with ferric oxide colloid, toxicity studies, 393*
Bone with ^{85}Sr and ^{87}Sr, 392*
Brain and liver scans as screening procedure for bronchogenic carcinoma, 389*
Brain scanning in children with ^{99m}Tc pertechnetate, 390*
Brain scanning with ^{99m}Tc, 359*
Brain with ACRH system, 1
Bronchogenic carcinoma with ^{197}Hg chlormerodrin and ^{131}I MAA, 25
Cardiac blood-pool scans for intracardiac myxoma diagnosis, 35
Cardiac scanning with dual-isotope techniques, 359*
^{11}C for scanning, 305*
Celiac arterial perfusion scanning, 310*
Cerebro-pulmonary scan with ^{131}I MAA, 392*, 709
^{134m}Cs and ^{129}Cs for blood-flow scanning, 305*
Chronic thyroditis, scanning patterns in, 338*
Colloidal ^{113m}In for liver spleen and bone-marrow scanning, 304*
Color scanning with ^{99m}Tc pertechnetate, 394*
Comparison of gamma camera and scanners for brain tumor with ^{99m}Tc-pertechnetate, 487
Comparison of scanner and camera, 321*
Comparison of ^{113m}In and ^{99m}Tc as agents for cerebral scanning, 261*
Comparison of ^{113m}In chelates and ^{99m}Tc pertechnetate as agents, 261*
Computer-processed scans, clinical aspects of, 388*
Correlation of brain scanning with other neurological diagnostic procedures, 265*
Comparison of RIHSA and ^{197}Hg-chlormerodrin for scanning intracranial arteriovenous malformations, 879
Computer analysis of scans, 290*
Computer representation of three-dimensional scan data, 288*
Data blending with ^{99m}Tc in thyroid scanning, 338*
Depth discrimination in color by dual-channel scanning, 322*
Diagnosis of low-pressure hydrocephalus by CSF ^{131}RISA scanning, 267*
Digital-data recording and image enhancement, 289*
Electronic analog contrast enhancement, 404*
Extra-thyroidal neck radioactivity, 810
False-positive hepatic scan, 451
Feasibility of quantitative scanning, 769†
Filtering scan data using system response function, 286*
Full-size scintiphotos from camera, 403*
^{18}F localization in soft tissue deposits of osteogenic sarcoma, 646
^{68}Ga-labeled hydrous ferric oxide colloid, distribution in bone marrow, 302*
^{131}I concentration in facial structures, 398*
Image quality improvement by spatial filtering, 286*
Improved kidney-scanning method, 358*
Improved liver-scanning method, 358*
Improved pancreatic-scanning method, 358*
Inexpensive brain-scan phantom, 694
Information transfer function for evaluating procedures, 283*
^{131}I MAA for cerebro-pulmonary scans, 709
Joint, three years experience, 273*
Kidney scans for evaluating renal trauma in children, 283*
Liver, allocation of amoebic abscess, 311*
Liver, ^{198}Au scanning hepatic amoebic disease, 310*
Liver regeneration after hepatectomy, evaluated by, 309*
Liver scan in detecting and treating amoebic abscess, 402*
Logarithmic plotting of scan surface area, 399*
Lung and liver with ^{51}Cr-Dextran, 306*
Lung in chronic respiratory disease, 397*
Lung anterior and posterior scans compared for information content, 347*
Lung scans in general hospital population, diagnostic value of, 402*
Lung scanning, evaluation of ethiodol as agent, 391*
Lung scanning with ^{113m}In iron hydroxide particles, 346*
Lung, significance of shine through on side-view scan, 400*
Lung, with dual-detector system, 346*
Lymph-node scanning with radiogold, 296*
Mechanism of brain and tumor penetration by scanning agents, 792
Middle cerebral artery occlusion, scan pattern variation in, 380
Modulation transfer and scintillation limitations in gamma-ray imaging, 284*
Multi-isotope scanning by color modulation, 323*
Misinterpretation of lung scans in diagnosis of pulmonary embolism, 345*
Myocardial scanning with ^{84}Rb, 359*
100-level computer-processed scintiscan, 287*
Optimum data processing of scans in two dimensions, 288*
Optimum scanning with ^{75}Se for pancreas and parathyroid, 321*
Pancreas carcinoma scanning, 387*
Pancrease-disease evaluation by dual-channel scanning, 349*
Pancreatic scanning, ^{99m}Tc compounds for, 302*
Parathyroid, with blood background subtraction, 311*
Pertechnetate trapping by thyroid, 336*
Photographic color display of scan data, 324*
Placental and cardiac scanning with ^{113m}In, 351*
Placental imaging and localization of with ionic ^{99m}Tc pertechnetate, 350*
Placental localization with free ^{99m}Tc pertechnetate, 773
Placental with ^{99m}Tc albumin, 387*
Processor for scan data, 289*
Pulmonary distribution of ^{133}Xe solution and ^{131}MAA, a comparison, 344*
Pulmonary scanning and angiography in embolic lung disease, a correlation, 344*
Quantitative ^{198}Au scan in diffuse hepatic parenchymal disease, 309*
Quantitative organ scanning, 285*
Quantitation of RISA aerosol distribution in normal lung, 404*
Quantitative scanning, with variety of radionuclides and labeled compounds, 285*
Radioactivity uptake in organs, *in vivo* measurement of absolute quantities, 397*
Radioalbumin suspensions with higher specific activity and more uniform size, 303*
Rapid sequential scanning in assessing differential kidney function, 282*
Rectilinear scanners and scintillation cameras, evaluation of for scintiphotography, 389*
Regional alterations of lung ventilation/perfusion ratios determined by scanning, 343*
Regional arterial blood flow of limbs, scanning with I^{131} MAA, 279*
Salivary gland scanning with ^{99m}Tc pertechnetate, 351*
Scan analysis with color contrast, 324*
Scan analyzer produces color display from black and white, 323*
Scan quality, how to judge it, 362*
^{75}Se-selenate and selenite for scanning lymphomas, 197
^{75}Se-selenomethionine for scanning lymphomas, 197
Sequential sampling analysis, application to scanning, 314*
Scintiscanning and scintiphotography, a comparison, 319*
Simulation of data with computer, 312*
Solitary autonomous thyroid nodules, 701
Spleen pickup of ^{198}Au, 402*
Spleen with ^{99m}Tc-labeled erythrocytes, 229
Splenic concentration of ^{198}Au in liver scans, 390*
^{87m}Sr for bone scanning, 273*

Stannous hydroxide precipitates as carrier for ^{99m}Tc in perfusion scanning, 304*
Stomach with ^{131}I Toluilen red, 395*
^{85}Sr bone scans, aid in selecting patients for ^{32}P therapy, 390*
Subtracting one isotope distribution from another, 411; correction, 501
Survey of medical uses of radioisotopes, 307*
System parameters, quantitative assessment of, 284*
^{99m}Tc, ^{68}Ga, ^{113m}In for scanning liver, lung, kidney and brain comparative evaluation, 301*
^{99m}Tc iron colloid for bone-marrow scanning, 301*
Thyroid scans obtained incidental to brain scans with ^{99m}Tc-pertechnetate, 481
Thyroid uptake and scanning with ^{99m}Tc pertechnetate, 337*
Tumor, positive scintigraphy with intraarterial injection of ^{125}I MAA, 313*
Uniformity in, 361*
Uptake of ^{99m}Tc pertechnetate by choroid plexis, 387*
Vascularity of femural head by, 403*
Vertex view in brain scanning, clinical use of, 384*
With linear scanner, 859
Scanning electron microscope, 385*
Schizophrenia affected by methionine, 325*
Selenomethionine-^{75}Se
Animal studies with, 350*
Improved pancreatic scanning method with, 358*
Incorporation in lymphocytes, test of globulin synthesis, 290*
Optimum scanning for pancreas and parathyroid, 321*
Pancreas carcinoma scanning, 387*
Uptake in mouse and human lymphomas, 197
Selenium-75
Activity assays, 381*
Pulmonary excretion of ^{75}Se, relationships to liver function, 309*
Quantitative counting of, 502
Selenate and selenite labeled with for lymphoma scanning, 197
Skin, counting ^{32}P in lesions with solid-state detectors, 444
Society of Nuclear Medicine, President's Annual Report, 699
Sodium determination in human bile by activation analysis, 891
Sodium in interaction with serum protein, 652
Sodium pertechnetate, tissue distribution of, labeled with ^{99m}Tc, 50
Specific activity estimated in phantom target with external counting, 331*
Spleen
Colloidal ^{113m}In for scanning, 304*
Pickup of ^{198}Au, 402*
Splenic concentration of ^{169}Au in liver scans, 390*
Splenic sequestration of ^{51}Cr red cells in hepatosplenic bilharziasis, 396*
^{99m}Tc-labeled erythrocytes for scanning, 229
Trapping of heated erythrocytes in leukemia, 379*
Stomach scanning with ^{131}I Toluilen red, 395*
Strontium-85
Bone scanning with, 392*
Compression of vertebraes studied with, 272*
Distribution pattern in osteoarthritis of knee, 273*
Kinetics in bone in hypoparathyroidism, 60
Localization of bone disease with ^{85}Sr, 723
^{85}Sr bone scans, aid in selecting patients for ^{32}P therapy, 390*
Strontium-87m
Assay with ^{113}Sn/^{113m}In as calibration standard, 74†
Bone scanning with, 392*
For bone scanning, 273*
Strontium-90, effect of stable calcium on ^{90}Sr absorption, 398*
Sulfur-35, counting with anthrocene cell, 822
Survey of medical uses of radioisotopes, 307*

T

Technetium-99m
Brain scanning in children, 390*
Brain scanning with, 359*
Brain scanning with pertechnetate, accuracy of, 187
Cardiac blood pool scan for intracardiac myxoma diagnosis, 35
Cerebral blood-flow dynamics correlated with time-lapse scintiphotography, 263*
Cerebral blood-flow studies, 264*
Collimator designed for ^{99m}Tc scanning, 143
Colloid in RES distribution studies of bone marrow, 430
Colon scanning with ^{99m}Tc pertechnetate, 394*
Comparison of ^{113m}In and ^{99m}Tc or agents for cerebral scanning, 261*
Data blending with ^{99m}Tc in thyroid scanning, 338*
Early thyroid uptake measurements with scintillation camera and 1,600-channel analyzer, 336*
Effectiveness of using ^{99m}Tc sulfur colloid with scintillation camera, 360*
High specific activity ^{99m}Tc albumin, 396*
Human serum albumin for intracardiac myxoma diagnosis, 35
Joint scanning, 273*
Kinetic studies in brain scintiphotography, 262*
Labeled erythrocytes for spleen scanning, 229
Pancreatic scanning, ^{99m}Tc compounds for, 302*
Patient reactions to ^{99m}Tc sulfur colloid prepared by thiosulfate-dextron method. 896†
Pertechnetate scanning of thyroid with low iodine uptake, 383*
Pertechnetate trapping by thyroid, 336*
Placental imaging and localization with ionic ^{99m}Tc pertechnetate, 350*
Placental localizations with free ^{99m}Tc pertechnetate, 773
Placental scanning with ^{99m}Tc albumin, 387*
Preparation and distribution of ^{99m}Tc(V)-citrate complex, 666
Radiation exposure from generator, 307*
Renal and cerebral blood-flow studies with scintillation camera, 263*
Salivary gland scanning, 351*
Sequential cranial scintiphotography for vascular characterization of brain lesions, 262*
Sodium pertechnetate, fate and tissue distribution of, 50
Stannous hydroxide precipitates as carrier for ^{99m}Tc in perfusion scanning, 304*
Sulfide colloid preparation, a modified procedure, 692
^{99m}Tc, ^{68}Ga, ^{113m}In, comparative evaluation for scanning, 301*
^{99m}Tc iron colloid for bone-marrow scanning, 301*
Thyroid scans obtained incidental to brain scans, 481
Thyroid uptake and scanning with ^{99m}Tc pertechnetate, 337*
Uptake by choroid plexis, 404*
Uptake of pertechnetate by choroid plexis, 387*
Venous blood-flow measurements in legs with, 277*
Yield from ^{99}Mo generators, 426
Therapy
Abnormalities in histidine metabolism following radiation, 340*
Allograft survival following antibody suppression with ^{131}I-labeled antigen, 348*
Aminopterin-^{131}I, a folate antagonist, 348*
Chromosomal aberrations in hamster thyroid after ^{131}I administration, 333*
Comparisons of radiocolloid distribution following administration by portal vein and peripheral vein injections, 349*
Hyperthyroidism treatment with ^{131}I, 335*
Hypothyroidism after hyperthyroidism therapy with ^{131}I, 399*
Induction of mouse leukemia, age factors in, 339*
Intralymphatic administration of radioisotope in malignant melanoma treatment, 347*
Labeled phosphate uptake in irradiated tissues, 386*
Lipid metabolism of thymus after gamma irradiation, 334*
Morphological and functional changes in thyroid tissue with ^{131}I, 334*
Parameters of postirradiation cell survival, numerical method for estimating, 340*
Radiobiologic factors in radioiodine-induced hypothyroidism, 333*

RBE of negative pion beams in Bragg Peak region, 341*
Repair of radiation injury by L cells, role of energy metabolism in, 340*
Short-term results of ^{131}I therapy of hyperthyroidism, 334*
^{85}Sr bone scans, aid in selecting patients for ^{32}P therapy, 390*
Thyroid
Autonomous function of nodular thyroid with double-isotope autoradiography, 337*
Blocking agent (Flagyl) interferes with thyroid-function test, 478
Chromosomal aberrations in hamster thyroid after ^{131}I administration, 333*
Chronic thyroiditis, scanning patterns in, 338*
Computer model of iodine metabolism for studying endemic goiter, 332*
Data blending with ^{99m}Tc in scanning, 338*
Early uptake measurements with scintillation camera and 1,600-channel analyzer, 336*
Extra-thyroidal neck radioactivity, scanning, 810
Extra-thyroid neck tissue radioactivity, estimation of, 678
Fetal thyroid uptake of ^{131}I, 157
Function, equilibria involved in Trisorb resin test, 400*
Function tests, reproducibility of, 397*
Function using Trisorb resin sponge, clinical and equilibria studies, 740
Function, with oragrafin and triiodothyronine uptake, 209
Hyperthyroidism treatment with ^{131}I, 335*
Hypothyroidism after hyperthyroidism therapy with ^{131}I, 399*
Increased detector sensitivity in iodine uptake, 86
Modified T-3 test, 356*
Morphological and functional changes in thyroid tissue with ^{131}I, 334*
Pertechnetate trapping by, 336*
PBI determination by activation analysis, 123
Radioiodine therapy of thyrotoxicosis and thyroid cancer, 256*
Radioiodine thyroid tests, a comparison, 338*
Radiobiologic factors in radioiodine-induced hypothyroidism, 333*
Ratio of PBI to *in vitro* binding of triiodothyronine by serum proteins, index of free thyroxine in serum, 381*
Scanning, low iodine uptake, 383*
Scans with ^{99m}Tc-pertechnetate obtained incidental to brain scans, 481
Short-term results of ^{131}I therapy of hyperthyroidism, 334*
Solitary autonomous thyroid nodules, 701
T-3 resin sponge test with cold incubation, 475
Three-day, double-isotope suppression test, 627
Toxic adenoma diagnosis and treatment, 513
TSH effect on solitary hyperfunctioning thyroid nodule, 758
Uptake and scanning with ^{99m}Tc pertechnetate, 337*
Thymus lipid metabolism after gamma irradiation, 334*
Training requirements for physicians in nuclear medicine, 900
Tritium-3, folic-acid-absorption determination, 40
Turnover compartmentalization theory, 327*

W

Whole-body counter
Accuracy and precision of assay, 328*; correction, 450
Body retention of ^{47}Ca determined by, 270*
Clinical uses of, 588
Loss of labeled albumin in children measured by, 330*
Use for radiopharmaceutical dosimetry, 306*

X

Xenon-133
Assay of, 363*
Cerebral blood-flow with scintillation camera, 264*
Muscle blood flow in hemiplegic patients, 277*
Preparing and dispensing in isotonic saline, 401*
Pulmonary distribution of ^{133}Xe solution and ^{131}I MAA, a comparison, 344*
Regional pulmonary ventilation with ^{133}Xe and Anger camera, 343*
Xenon-135, lung ventilation and perfusion by camera and ^{135}Xe, 393*
X-ray (isotopic) sources for absorptiometry in two-component systems, 388*

Z

Zinc
Binding capacity of serum, 299*
Excretion promoted by ^{65}Zn disodium EDTA chelate, 110
^{65}Zn metabolism in cirrhotic rats, 299*

SNM MEMBERSHIP DUES INCREASE

In December, 1966, the Board of Trustees voted to increase membership dues. This action was taken to meet rising operational costs and to provide funds for the expansion of educational programs.

As announced at the 14th Annual Meeting in Seattle, effective January 1, 1968 the new dues for the National Organization are:

Full Members	$25.00
Associate Members	$20.00
Technical Affiliates	$12.50

This new dues schedule is still below the median for comparable organizations and we hope to continue to maintain this relatively low level of assessment.

BOARD OF TRUSTEES

ERRATA

James W. Tyson, James H. Meade, Jr., Glenn V. Dalrymple, and Horace N. Marvin: Some Biomedical Applications of a Non-Linear Curve Fit Method, *Journal of Nuclear Medicine* 8:558-569, 1967.

Pg. 559 Line 22 should read: $y = (1 - x/\beta)e^{-\alpha x}$ (1a)

Pg. 559 Line 31 should read: $P(t) = (1 - t/L)e^{-Kt}$ (1b)

Pg. 560 Line 9 should read:
tion 2b n corresponds to α and D_0 to β of eq. 2a. This equation is almost always

Pg. 561 Line 18 should read:
mates[7], truncating the higher order terms, estimating the corrections by least

Pg. 563 Line 13 should read: $P = (1 - t/L)e^{-Kt}$ (8)

Pg. 563 Line 15 should read: $\left(\frac{\epsilon P}{\epsilon K}\right) = - te^{-Kt} + t^2 e^{-Kt}/L$ (9)

The authors made reference to three of the tables as figures in the text, which resulted in the mislabeling of two figures. The following changes will make the references to figures in the text correct.

Table III should be labeled Figure 2. p 567
Figure 2 should be labeled Figure 3. p 565
Table IV should be labeled Figure 4. p 568
Figure 3 should be labeled Figure 5. p 566
Table V should be labeled Figure 6. p 569

FIELD REPRESENTATIVE
to "share the rewards of discovery"
in RADIO - PHARMACEUTICALS

Heavy emphasis on research in the field of nuclear medicine has positioned Abbott Laboratories into the forefront of the radio-pharmaceutical industry—but we know that the advanced technology of today is only the beginning so we're stepping up the pace, moving ahead, with a major expansion of our product line and our entry into dynamic new markets.
To spark this program, we must have top calibre, technically trained sales representatives. Experience in the field of nuclear medicine is desirable however, our emphasis is on sales capability and scientific background. Abbott will provide you with a comprehensive training program.
You will represent Abbott in a field that it has pioneered; calling on physicians, hospitals and nuclear medical laboratories; creating awareness and motivating sales of Abbott radio-pharmaceuticals and providing on-the-spot technical assistance.
Some travel; auto is furnished and expenses are paid by Abbott. Assignments are available throughout the country. Your future growth and your share in the "rewards of discovery" will reflect your enthusiasm and the value of your contribution. For details, send your resume in confidence to:
